

Treatment : Recovery : Alcohol : Kirklees

Treatment : Recovery : Alcohol : Kirklees

On-TRAK is committed to providing a wide range of services for people experiencing and affected by alcohol misuse. We provide information to help people find out what options are available and make informed choices about their treatment.

We are committed to effective inter-agency working to maximise treatment outcomes, eg Domestic Violence services, Housing and Drug Intervention Programmes. We also deliver the treatment element of the Alcohol Treatment Requirement with Probation.

The service aims to be accessible to the diverse communities in Kirklees and to individuals who find it hard to access services eg prisoners, street drinkers. We have skilled workers who provide support to diverse communities and have access to translation and interpretation requirements. We offer out of hours opening times and our buildings are fully accessible.

If you would like to make a referral or require advice about supporting someone into the service please contact the relevant number below and a member of the team will be able to assist you.

Information for Referring Agencies and Professionals

On-TRAK will be accessible to people with alcohol problems residing within Kirklees and can be accessed via self-referral. The service will be delivered out of two central sites, via alcohol shared care GP practices and from other locations where appropriate. Service users will be either moderately or severely alcohol dependent adults requiring structured treatment. Hazardous and/or harmful adult drinkers can be offered alcohol focused interventions

What On-TRAK can offer:

- Open access times, walk -in provision and telephone support
- Holistic screening and assessment which focus on the service user's wider needs not just the alcohol use
- Individual care planned and co-ordinated treatment
- 1 to 1 keyworking appointments
- Psychosocial interventions
- Specialist groupwork
- Community detox; access to in-patient detox and rehab
- Counselling service
- Harm minimisation and blood borne virus screening
- Access to GP prescribing in local areas
- Access to clinical prescribing treatment
- Aftercare
- Relapse prevention
- Assertive engagement team
